WEDDING VIDEOS ARE CHEESY

People think of their parents wedding videos and remember how cheesy they were with guest interviews, but the truth is that the wedding video industry has completely changed. Videography experts who have graduated from art schools know how to capture only the important moments from great angles and with HD cameras.

WE WILL NEVER WATCH THE VIDEO

Since wedding videos are becoming shorter, and the internet is becoming more popular why would you not watch and share your wedding video?! A highlight edit video from your wedding day is perfect to show off to facebook friends and distant relatives who could not make it to the wedding. Also, many couples love looking back on their videos during anniversaries, holidays and showing them off to their children. A video captures the full experience better than pictures can.

WEDDING VIDEOS ARE LONG & BORING

Long and boring video are a thing of the past so there is nothing to worry about! Wedding videographers are trained and know how to edit hours of video footage. They can make it as short or as long as you would like it to be and can include any footage from the night you choose. To keep the video fun, songs are put in the background of your video!

I ONLY NEED ONE VIDEOGRAPHER FOR MY WEDDING

The truth is, more planning goes into a short wedding video than you think. In order to capture every special moment from every angle, it requires multiple videographers. You may be thinking that multiple videographers sounds too distracting, but in reality it helps your day go even smoother. With multiple videographers set up, there will be less running around for them and you will be assured that they do not miss a thing.

THERE'S NO MONEY IN MY BUDGET FOR A VIDEO

You spend so much time and money on making your day perfect, why would you not want to have it on video to last a lifetime? The truth is many couples think that just photos will do, but after their wedding they regret not recording their big day. There are also many different packages to choose from and your videographer can make sure they capture it all, while still staying in your budget!
